Retail Management Research Centre

Our motto, "EDHEC for Business", reflects a commitment to businesses integral to the development of our programmes. The school's ambitious research policy, itself a reflection of this commitment, has led to the creation of research centres whose expertise our programmes draw on to offer students an uncommon training ground on which to strive for excellence. Indeed, in addition to the research centres' broader contributions to the curricula, the work of these centres provides students inspiration for their master's projects.
